Consider enhancing hit-&-run payouts: SC

New Delhi, Jan 14: The Supreme Court has directed the Centre to consider whether the compensation amounts in case of death and grievous injury in hit-and-run accidents can be enhanced annually. The apex court noted that the Motor Vehicles (MV) Act, 1988 provides that in case of death of any person resulting from hit-and-run accident, a compensation of ₹2 lakh or such higher amount as may be prescribed by the central government shall be paid and in case of grievous injury, the compensation amount is ₹50,000.

in the last five years, there were 660 deaths in hit-and-run cases, and there were 113 injury cases for which compensation of ₹184.60 lakh was disbursed," the bench said in its January 12 order. "If we compare the number of hit-and-run road accidents reported and the number of cases registered for seeking compensation, what stares at the face is that negligible number of victims have taken advantage of the said scheme," it said.

Rane questions Shankaracharyas' contribution

Mumbai, Jan 14: The Opposition in Maharashtra Sunday attacked Union Minister Narayan Rane for his comments on the Shankaracharyas and sought his dismissal from the Narendra Modi government and an apology from the BJP. Speaking to reporters Saturday in Palghar, Rane had said the Shankaracharyas should bless the Ram Temple instead of criticising some aspects and accused them of looking at Prime Minister Narendra Modi and the BJP through a "political prism".

"Shankaracharyas should tell what is their contribution to the Hindu religion," he had said. Speaking to reporters Sunday, Shiv Sena (UBT) leader Sanjay Raut said Rane had insulted Hinduism by questioning the contribution of the Shankaracharyas.

SPEAKING TO REPORTERS SUNDAY, SHIV SENA (UBT) LEADER SANJAY RAUT SAID RANE HAD INSULTED HINDUISM BY QUESTIONING THE CONTRIBUTION OF THE SHANKARACHARYAS

Supriya Sule, working president of the Sharad Pawar-led Nationalist Congress Party said it was for the BJP to respond on Rane's comments. Meanwhile, Congress workers held protests

at the party office in Mumbai against Rane. Friday, VHP working president Alok Kumar said two of the four Shankaracharyas have "openly welcomed" the upcoming consecration ceremony, but none of them would attend the grand event to be held in Ayodhya January 22. They will visit the Ram temple later "as per their convenience", he said.

NRI woman raped New Delhi: The CEO of a private company has been booked for allegedly raping an NRI woman who worked at his office here, police said Sunday. According to the police, the incident took place September 14, 2023 at a five-star hotel in the Chanakyapuri area of New Delhi district.

Man electrocuted Hazaribag (Jharkhand): A 28-year-old man died of electrocution Sunday after a high-tension live wire fell on him in Jharkhand's Hazaribag district, prompting local people to block the National Highway 2 for several hours, police said.

4-yr-old boy dies Ahmedabad: A 4-year-old boy died after his throat was slit by the sharp string of a kite in Gujarat's Mahisagar district on the occasion of Uttarayan Sunday, with several others sustaining injuries in kite-related incidents across the state, officials said.

Dense fog hits flight operations in Delhi

Nearly 100 flights, including overseas services, were delayed and some of the flights cancelled due to the bad weather, the official said

New Delhi, Jan 14: A total of 10 flights were diverted, nearly 100 delayed and some cancelled at the Delhi airport Sunday morning as low visibility conditions due to dense fog disrupted operations. An official said a total of 10 flights, including 2 international flights, were diverted to Jaipur between 4.30 am and 12 noon.

Vancouver that was to depart early in the morning was rescheduled. Passengers had to wait inside the aircraft for many hours before they deboarded. After boarding was complete, the flight, which was to depart little past 5 am could not take off due to the dense fog. An airline official said that after waiting for a few hours, it was decided to reschedule the departure of the flight as the crew would have also breached the flight duty timing requirements. Now, the flight is expected to leave at around 11:30 pm. The passengers have been provided accommodation, the official added.

said that due to prevailing weather challenges in northern India, flight schedules may experience interruptions. Vistara, in a post on X at 6:38 am, said that due to dense fog and poor visibility in Delhi, arrivals and departures may be impacted from Delhi. "Due to adverse weather (fog) at Delhi, Chennai, Varanasi, Bagdogra & Lucknow our flight schedules have been affected, which may lead to consequential delays. We understand this may impact your travel plans and regret the inconvenience..." Akasa Air said in a post on X at 12:12 pm.

Rare Tibetan brown bear sighted in Sikkim

Gangtok, Jan 14: A rare Tibetan brown bear species has been found roaming in the high altitude areas of North Sikkim, officials of the state's Forest and Wildlife Department said Sunday. Camera traps captured the bear (scientific name: Ursus arctos pruinosus) with its characteristic yellowish scarf-like collar that broadens from the shoulders to the chest in Mangan district last month.

ferent from the more commonly found Himalayan black bear in terms of its appearance, habitat and behaviour. The omnivore lives in high-altitude alpine forests, meadows and steppe above 4000 m and feeds on marmots and alpine vegetation. "The discovery of a rare Tibetan brown bear marks a significant moment for biodiversity in the region and underscores the importance of preserving and protecting the state's precious wildlife," an official said.

Beehives, medicinal plants: BSF's plan to curb smuggling

The bees in the hives, the BSF feels, will act as a deterrent to cross-border criminals and smugglers who come closer or dare to cut the fence and breach it for smuggling cattle, narcotics, gold, silver and other items

Kolkata/New Delhi, Jan 14: To prevent smuggling of cattle and narcotics, the BSF will now have a second line of deterrence -- a thick hedge of more than 60,000 medicinal plants and 40 bee boxes -- along a three-kilometre fenced stretch of the India-Bangladesh border in West Bengal's Nadia district. "Beehives on the fence" was launched in November last year as part of the central government's "Vibrant Village Programme", and according to officials, it not only aims at preventing cross-border crimes but also generating employment for

locals through apiculture and horticulture. The flowering plants will also create an ecosystem for the bees to pollinate, a senior official of the AYUSH department said. This stretch along the border has been named "Arogya Path" (healthy street) and QR codes have been affixed which when scanned will give details about the plants, the official said, requesting anonymity. He added that the "path" doubles up as a nursery. Villagers of Kadipur in Nadia have been engaged in different works such as planting and watering the fruit-bearing and aromatic medicinal plants, and digging pits to extend the hedge, as part of the first phase of the project. An official of the Border Security Force (BSF) said 40 bee boxes have been fixed on poles of the metal fence over the last two months with the help of the National Medicinal Plants Board (NMPB).

feels, will act as a deterrent to cross-border criminals and smugglers who come closer or dare to cut the fence and breach it for smuggling cattle, narcotics, gold, silver and other items. Experts and officials from various central and state government departments are engaged in the project. Tulsii, Ekangi, Satmuli, Ashwagandha and Aloe Vera are among the plants that will make the hedge. More saplings, around 60,000, are in the process of being sent to the area by the NMPB and the AYUSH ministry, the AYUSH department official said. On creation of employment, the official said through this project, locals can earn through apiculture and horticulture. Commanding Officer (CO) of the BSF's 32nd Battalion, Sujet Kumar, who devised the initiative, said the enthusiasm of locals and authorities towards the project is unparalleled.

Pollution curbs back in Delhi

New Delhi, Jan 14: The central government Sunday ordered a ban on non-essential construction work and plying of BS-III petrol and BS-IV diesel four-wheelers in Delhi-NCR amid worsening air quality in the region. The Commission for Air Quality Management, a statutory body responsible for forming air pollution reduction strategies for the region and their implementation, noted a significant rise in Delhi's AQI (458 and 457 at 10 am and 11 am) due to unfavourable climatic conditions and local pollution sources. Anticipating a prolonged period of severe air quality, the committee decided to implement GRAP Stage-III curbs (severe air quality index (AQI) range) immediately to prevent further deterioration. The curbs include a ban on non-essential construction work and the plying of BS III

petrol and BS IV diesel four-wheelers in the region. Construction work related to national security or defence, projects of national importance, healthcare, railways, metro rail, airports, inter-state bus terminals, highways, roads, flyovers, overbridges, power transmission, pipelines, sanitation and water supply are exempted from the ban. The Graded Response Action Plan (GRAP) is the Centre's air pollution control plan implemented in the region during the winter season. It categorises actions into four stages: Stage I - 'Poor' (AQI 201-300); Stage II - 'Very Poor' (AQI 301-400); Stage III - 'Severe' (AQI 401-450); and Stage IV - 'Severe Plus' (AQI >450).

Huoco Looking at Japan to Raise Funds via ECB Route: CMD

New Delhi: State-run Housing and Urban Development Corporation (HUDCO) plans to raise funds from the Japanese market through the external commercial borrowing route next month, as it seeks to bring down overall financing costs, chairman and managing director Suryash Chakrabarti told ET. The plan is expected to help HUDCO raise funds at a 6.57% rate. The housing and infrastructure finance firm's current cost of borrowing is around 7.5%, which it is planning to reduce by 10 basis points by the end of the FY24. "We are making efforts to reach out to the Japanese market in February. Our objective is to cut down our cost of borrowing. Infrastructure is more sustainable if you have low-cost funding," Chakrabarti told ET. HUDCO is also looking to expand its loan book to ₹15,000 crore by FY26 from around ₹9,000 crore now, and ECBs would be a key component to bring down overall cost. Chakrabarti did not give details of the quantum as the plan was being fine-tuned. Economists are penciling in a change of stance from the Reserve Bank of India's monetary policy committee at its meeting in June and see a 25 basis points rate cut in the August meeting. "Now, there is a hope that the cost will come down after six months," Chakrabarti said, adding that the company was also looking to appeal to the government to give it some priority sector or development finance institution kind of status so that it can start raising at concessional rates. On the issue of finance, Chakrabarti said he was confident that HUDCO would meet its sanction target of ₹50,000 crore for FY24 and end the year with a better loan book. However, the housing finance company is unlikely to meet its ₹6,000 crore fund-raising target and may have to revise it down by nearly a fifth.

'Ad Spends on Connected TV may Touch \$500 m in 2027'

Streaming consumption to surge due to affordability of internet-enabled TVs: MIQ

Javed Farooqui
Mumbai: Advertisement spending on connected TV (CTV) is projected to touch \$500 million by 2027 as the consumption of streaming content increases due to the affordability of internet-enabled TV sets and wired broadband subscriptions, a senior industry executive has said.

On Air
56% of Indian consumers use a second screen while streaming videos or TV content.

72% prioritize pricing over content: MIQ

INDIA PLANS
MIQ is eyeing a turnover of ₹500 crore from the market in four years: Siddharth Dabhadre, South Asia M.D, MIQ

CTV households in India stand between 25 million and 35 million, says market estimates. Around 80-110 million viewers here, MIQ adds. However, Dabhadre believes ad spending will shift significantly towards CTV once it reaches the 200 million viewer threshold. According to market estimates, CTV households in India stand between 25 million and 35 million, translating to 80-110 million viewers. By 2027, it is expected to double to 160-200 million households with 200-270 million viewers. "The affordability of internet-enabled TV sets and wired broadband will drive growth in the CTV universe," he said, adding the top six metrics account for a sizable portion of the CTV base, with the base expanding rapidly in tier-1 and 2 cities. Dabhadre added the rapid increase in rural affordability and infrastructure development will drive CTV's future growth. "The demand for streaming content on TV is increasing even as content consumption on mobile devices is growing. The demand ecosystem has been established."

RIL Seeking a Minimum Rate of \$10 to Produce Gas from Coal Seams

PTI
New Delhi: Reliance Industries is seeking a minimum price of \$10 per unit for gas it plans to produce from coal seams, as it altered its pricing formula to reflect the changed energy scenario.

Reliance has sought bids from users for 0.99 million standard cubic meters per day of gas it will produce from coal-bed methane (CBM) block SP (West) CBM-200/1 in Madhya Pradesh, according to a tender floated by the company.

Users have been asked to quote a premium they are willing to pay over and above 12.6% of the Dated Brent crude oil price.

Gas price shall be higher than 12.6% of Dated Brent plus average unit 'V', or the government-declared monthly price for conventional gas. The government mandated price for January is \$7.82 per unit.

Reliance has set the starting bid price of 'V' at \$0.50 per million British thermal units - bidders have to quote 'V' higher than \$0.50.

At the current Brent crude oil price of \$76 per barrel, the minimum gas price comes to \$0.64 per unit (0.2675 of \$76 is \$8.88 per unit). Addition to this is a minimum premium of \$0.50, which takes the gas price to about \$1.14 per unit. Bids are planned for January 31, the tender document showed. The contract duration is for 10 years beginning April 1.

The pricing scheme is a fresh logic modified from the March 2022 auction. In that auction, it had sought bids at a premium over the base of 13.2% of Brent crude oil price.

"Advertisers use CTV frequently, their familiarity with the platform is also increasing. CTV is a new platform, so many advertisers are still learning how to use it effectively," Dabhadre said. MIQ, which entered India in 2023, is eyeing a turnover of '500 crore from the market in the next few years, Dabhadre said.

The demand for streaming content on TV is increasing over as content consumption on mobile devices is growing. The demand ecosystem has already been established, he noted. Meanwhile, a survey by MIQ revealed that 66% of Indian consumers use a second screen while streaming videos or TV content, and 72% prioritise pricing over content. "Advertisers use CTV frequently, their familiarity with the platform is also increasing. CTV is a new platform, so many advertisers are still learning how to use it effectively," Dabhadre said.

MIQ is eyeing a turnover of ₹500 crore from the market in 4 years: Siddharth Dabhadre, South Asia MD, MIQ. Advertisers evaluating campaign success based on reach/frequency. MIQ has access to data on over 763 billion impressions/commercials annually and over 140,000 TV viewership signals per household, resulting in 6.4 trillion TV content consumption signals. Dabhadre noted that CTV combines the engagement of traditional TV with the targeting capabilities of digital. "Advertisers use CTV frequently, their familiarity with the platform is also increasing. CTV is a new platform, so many advertisers are still learning how to use it effectively," Dabhadre said.

'Basic Research Needs Both Govt and Philanthropy'

Mrunmayee Kulkarni

Bengaluru: Governments and philanthropists have to work in tandem to advance the field of basic research, former Vice-Chancellor and Distinguished Professor of Australian National University, Brian Schmidt told ET. Schmidt, who had won the Nobel Prize in Physics for his work on the accelerating universe in 2011, was the chief guest at the Infosys Science Foundation awards in Bengaluru.

"Events like these inspire more people to take the plunge into research fields. It is important that we don't forget that every technology we have started with basic research. And it is important to celebrate it," he said.

Research into basic science often gets shunted to one side, he added, because it comes with a long-term view rather than immediate results. There is however an improvement in the way India is looking at research funding as its economy improves, he said. "In early 2000s, it was just kind of hard to spend the money when you're trying to get everything else to work. But I do think there's enough big companies and enough tax revenue that India is beginning to invest," he added.

Science, however, cannot wholly rely on philanthropists, he added. "The government can't wholly elect to ignore it. The solution for the government to take the agenda, and for philanthropy to try to find around it," he said. "It is also important, he said, to get more young students interested in entering research fields. "Right now, career security in academia isn't there. As we're never going to pay as much as industry. But to encourage, having the ability and freedom to do stuff for long time, flexibility within that, if it goes a long way. And achievements like the Infosys Awards certainly help," he said.

Schmidt, who is a fellow of the Australian Academy of Science, as well as a Foreign Member of the Indian Academy of Sciences, said both the countries could do a lot more in terms of collaborating in research. "I think things are beginning to move in that direction. The fact that [Prime Minister Narendra Modi] came and spent a weekend in Australia was important."

to help stop starving... But when you're elected every four or five years, the people get impatient," he said. "The government can't wholly elect to ignore it. The solution for the government to take the agenda, and for philanthropy to try to find around it," he said. "It is also important, he said, to get more young students interested in entering research fields. "Right now, career security in academia isn't there. As we're never going to pay as much as industry. But to encourage, having the ability and freedom to do stuff for long time, flexibility within that, if it goes a long way.
