Clause No.19.1 under Technical Specification for Road Works, which forms the part of agreement for road works, specifies that the contractors shall set up their own quality control laboratory at work site for carrying out mandatory field tests at site.

Henceforth, in case of all the road works involving bituminous construction with Hot Mix Plant, the contractor will provide all the testing apparatus including chemicals, required for testing of "Bitumen Content" at work site, to enable the Site Engineers to check bitumen content of the bituminous mix, at frequent intervals during execution of work.

No work of bituminous item shall be allowed to be executed, unless the above condition is satisfied.

Staff Officer (Civil) of the Areas will be responsible for strict compliance of the above guideline and this will come into force with immediate effect.
