#### Sub: Guideline regarding Abnormally High Rate (AHR) & Abnormally Low Rate (ALR) Items

The following Guidelines are to be implemented with immediate effect in respect of Abnormally High Rate (AHR) & Abnormally Low Rate (ALR) Items as follows:

1. The Abnormally High Rate (AHR) & Abnormally Low rate (ALR) items must be identified during tender evaluation & mentioned in the work order, indicating the award rate viz-a-viz updated rate of individual AHR / ALR items.
2. In case there are no AHR & ALR items, this should be recorded in the TCR that "the contract does not contain any AHR/ALR items" and the same should be mentioned in the work order.
3. For identification of AHR & ALR items the ceiling of +/- 20 % respectively, when compared with the updated estimated rate shall be applicable in the NIT of E&M Contractual Works instead of +/- 25 % as indicated in the NIT Format, circulated vide Ref. No.MCL/SAMB/E&M/2004-05/706, Dt.21/22.07.2004.
4. For identified Abnormally Low Rate (ALR) items, the contractor will be required to deposit with the company the difference in amount calculated between the departmental justified rate multiplied by the quantity of a particular ALR item and the ALR rate quoted by the contractor multiplied by the quantity of the same item. The amount so retained will be refunded on successful completion of individual ALR items of work.

Sl.No.1 & 2 above are in respect of Tender Evaluation and Award of Contracts & Sl.No.3 & 4 are to be incorporated in the NIT Format to be tendered for both Item Rate Contract & Turn-Key Contract of E&M Works upto value of Rs.50 Lakhs.

This issues with the approval of competent authority.
