

Talipada-Goudpada road construction in full swing in Lakhanpur Area **(18-08-2020)**

Connecting villages through roads has the potential to improve mobility thereby increasing access to economic opportunities in rural hinterlands. This creates a rural eco-system of development through socio-economic inclusion and empowerment.

While the Government is pioneering rural road developments schemes through its flagship programme of PMGSY, MCL is doing its bit in its operational area by taking up a number of rural road construction and repair projects at Panchayat level under its CSR.

One such project is a cement concrete all-weather road from Talipada to Goudapada at Bandhbahal Gram Panchayat in Lakhanpur Area. Sanctioned for Rs 49.50 lakh, the project is going to be completed by October.

In 2019-20, Company spent Rs 146 Cr in rural areas under the thematic sectors of rural development, education & livelihood and healthcare & water. This shows company's commitment for improving lives of the rural community, which is possible with the active guidance and assistance of district administration and Government.
