

Blood Donation Van to Aspirational District Kandhamal

Kandhamal is one of our four aspirational districts in which MCL has been taking up a lot of developmental works under its CSR initiatives. As part of aspirational district program, Blood Collection Van was launched for the service of the general public Kandhamal district. The vehicle was launched in presence of public representatives, officials from district administration and MCL on 11-04-2023. Blood collection van will help in increasing awareness in public regarding blood donation, improve rate of blood collection and quality storage of blood. Scarcity of blood and improper storage of blood causes thousands of death every year, especially in non-metro Politian area where high-tech health services are not available. This will overall help in improving health infrastructure of the district and great use of general public.
