

BoVs (Battery Operated Vehicles) for door to door waste collection

MCL is contributing towards sustainable sanitation: steps a foot for eco-friendly solid waste management by introducing additional 10 nos. of BoVs (Battery Operated Vehicles) for door to door waste collection from households in Sambalpur Municipality Corporation. The vehicles will be operated by members of Self Help Groups (SHGs) which will two-fold the impact of the initiative. This is one-of-its-kind sustainable initiative under CSR for women empowerment besides encouraging environment friendly cleanliness drive.

The e-vehicle was launched for public service by the SMC commissioner and GM (CSR).
